[The Impact of Open Reduction Internal Fixation on Acute Pain Management in Unstable Pelvic Ring Injuries.\[Article\]](#)

Source

Journal of Trauma-Injury Infection & Critical Care.

Status

Publish Ahead of Print, POST AUTHOR CORRECTIONS, 4 December 2009

Abstract

Background: The management of unstable pelvic ring injuries is complex. Displacement is a clear indication for surgical intervention. However, reduction of acute pain after stabilization may have substantial clinical benefits and affect management decisions. The purpose of this study was to
